ENG 1213: ENGLISH LANGUAGE LAB

Lab Hrs	: 3	Sessionals	: 50
Tutorial	: 0 Period	Ext. Marks	: 50
Exam	: 3 Hrs.	Credits	: 2

The **Language Lab** focuses on the production and practices of sounds of language and familiarizes the students with use of English in everyday situations and contexts.

SYLLABUS:

1. English Sound Pattern – Letters
2. Sounds of English
3. Pronunciation
4. Stress and Intonation.

OBJECTIVES:

- To make students recognize the sounds of English through Audio-Visual aids.
- To help students build their confidence and help overcome their inhibitions and self consciousness while speaking in English. *The focus shall be on fluency.*
- To familiarize the students with stress and intonation and enable them to speak English effectively.

LEARNING OUTCOMES:

- Students will be sensitized towards recognition of English sound pattern.
- The fluency in speech will be enhanced.

Prescribed Text Book:

Speak Well, Board of Editors, Orient Black Swan Publishers, Hyderabad, 2012.

Speak Well, the print as well as audio materials, is learner friendly and suitable for use in a multimedia language laboratory. These materials are developed to facilitate practice in improving the intelligibility and communication skills in English, for technical, students at the undergraduate level.

The materials mainly aim at self study, monitored by a teacher whenever essential. The teacher intervention is kept to a minimum, only to give a right direction to the learners.

Communication in any language depends on clarity of speech. This is true of English too. Articulation of the sounds, and pronunciation of sounds from the basis of intelligibility. The few units focus on bringing home the importance of this aspect with copious examples and opportunities for practice. Models of standard pronunciation are given. Explanations are kept short and simple. The IPA symbols, presenting the sound system in English, used in this are the

same as in standard English dictionaries. These symbols are to be used at the recognition level to facilitate the learners' use of dictionary for pronunciation. Problem areas are pointed out and, where necessary, deviation in the pronunciation of the Indian speakers of English are brought to the notice of the learners.

The units called 'Interactions' pay attention to the natural conversational skills in different contexts with focus on various functions of the language. Model conversations are provided as samples. Notes on appropriate expressions used in different situations' drawn the learners, attention the use of language in context. Exercises and activities reinforce the functions introduced.

Exam	: 3 Hrs.	Credits	: 2

The **Language Lab** focuses on the production and practices of sounds of language and familiarizes the students with use of English in everyday situations and contexts.

SYLLABUS:

5. English Sound Pattern – Letters
6. Sounds of English
7. Pronunciation
8. Stress and Intonation.

OBJECTIVES:

- To make students recognize the sounds of English through Audio-Visual aids.
- To help students build their confidence and help overcome their inhibitions and self consciousness while speaking in English. *The focus shall be on fluency.*
- To familiarize the students with stress and intonation and enable them to speak English effectively.

LEARNING OUTCOMES:

- Students will be sensitized towards recognition of English sound pattern.
- The fluency in speech will be enhanced.

Prescribed Text Book:

Speak Well, Board of Editors, Orient Black Swan Publishers, Hyderabad, 2012.

Speak Well, the print as well as audio materials, is learner friendly and suitable for use in a multimedia language laboratory. These materials are developed to facilitate practice in improving the intelligibility and communication skills in English, for technical, students at the undergraduate level.

The materials mainly aim at self study, monitored by a teacher whenever essential. The teacher intervention is kept to a minimum, only to give a right direction to the learners.

Communication in any language depends on clarity of speech. This is true of English too. Articulation of the sounds, and pronunciation of sounds from the basis of intelligibility. The few units focus on bringing home the importance of this aspect with copious examples and opportunities for practice. Models of standard pronunciation are given. Explanations are kept short and simple. The IPA symbols, presenting the sound system in English, used in this are the

same as in standard English dictionaries. These symbols are to be used at the recognition level to facilitate the learners' use of dictionary for pronunciation. Problem areas are pointed out and, where necessary, deviation in the pronunciation of the Indian speakers of English are brought to the notice of the learners.

The units called 'Interactions' pay attention to the natural conversational skills in different contexts with focus on various functions of the language. Model conversations are provided as samples. Notes on appropriate expressions used in different situations' drawn the learners, attention the use of language in context. Exercises and activities reinforce the functions introduced.
