ABOUT THE ORGANISATION

Andhra University was established in the year 1926. The 91-year-old institution is fortunate to have Sir C.R. Reddy as its founder Vice-Chancellor, as the steps taken by this visionary proved to be fruitful in the long run. Former President of India Dr. Sarvepalli Radhakrishnan was one of its Vice-Chancellors who succeeded Dr. C. R. Reddy in 1931. The leaders of the University always believed that excellence in higher education is the best investment for the country and engaged the services of famous educationists who set high standards for teaching and research. Keeping in pace with the global needs and challenges under the leadership and guidance of successive Vice-chancellors, the University has flourished well and became a platform for high learning and quality research. The National Assessment and Accreditation Council of India has reaccredited at "A" Grade with a CGPA of 3.60 out of four point scale in 2015. The University got ISO 9001:2008 certification for its quality standards.

DST-PURSE

The DST has identified Andhra University as one of the 14 performing Institutions in terms of research contributions. The H-Index based on Scopus of the University stands between 40-49. Based on the research outcome of the University during the last five years the Department of Science and Technology, Government of India awarded second phase PURSE Programme. PURSE scheme provides substantive research grant to Universities

based on scientific publications in Science Citation Indexed Journals through SCOPUS Database. Under the PURSE Programme, DST intends to provide support to performing Universities across the country essentially for research.

ADVANCED ANALYTICAL LABORATORY

The Advanced Analytical Centre was established in the year 2009. The centre is equipped with sophisticated equipment and facilities to help the faculty, research scholars and students to carrying out globally competitive R & D in basic and applied sciences. All major areas includes Life sciences, Chemical, Physical, Pharmaceutical, Mathematical, Earth sciences and Engineering are being helped by this programme.

OBJECTIVE

The proposed programme is organized with an aim to train academicians and researchers in the field of Life sciences, Physics, Chemistry, Mathematics, Engineering, Pharmacy and Earth sciences in the handling and sample analysis of high end instruments like LCMS-TOF, DNA-Sequencer, Universal Testing Machine (UTM), TG/DTA, DSC and statistical software like Minitab.

WHO CAN APPLY

Academicians and researchers working in the Universities, Colleges and Institutions and with **THREE YEARS OF RESEARCH EXPERIENCE** can apply.
