About Andhra University

Andhra University is a globally recognized institution established in 1926 in the city of Destiny Visakhapatnam, Andhra Pradesh, India, receiving an A++ grade (score 3.74) from the National Assessment Accreditation Council (NAAC) in 2023 signifies the University's unwavering commitment in delivering high quality education and academic excellence. Andhra University actively cultivates a dynamic research environment through collaborations with prestigious international institutions, fueling groundbreaking discoveries and propelling academic progress. The university bridges academia- industry gap through strategic partnerships, equipping students with sought-after industry relevant event skills for flourishing careers. Andhra university actively engages in impactful social welfare initiatives, fostering a strong sense of social consciousness within the student body. Its remarkable achievements, deserve recognition, serving as a catalyst for further collaborations in higher education.

About Botany Department

Andhra University, Department of botany was established in 1946, with Prof. M. O. P. Iyengar as the first head, Prof. J. Venkateswarlu and Prof. B. S. Rao as founder faculty members. The department has various research thrusts specialized in different fields of botany. Cytogenetics has been one of the thrust areas in research activities of the Department and identified as one of the pioneer center and UGC has recognized the department as a center for Special Assistance Programme (UGC-SAP). Based on the research activities it is identified as Center for advanced studies (CAS). The department has internationally recognized herbarium (CODE: AUV), and Museum and Lead Botanical garden.

About Workshop

India is one of the 12 mega biodiversity countries in the world. It has 10 biogeographical zones which covers diversified flora and fauna. Eastern Ghats spreads over states of Andhra Pradesh, Karnataka, Odisha, Tamil Nadu and Telangana. The region has a most humid tropical monsoon climate, characterized by moderate to high year-round temperatures/seasonal heavy rainfall. Eastern Ghats are a rapidly changing frontier in India, with most of its forests already on the edge of extinction. Conservation of endemic species are crucial to the health of our planet because of the enormous variety of living beings they contribute to the environment.

Key note Speaker

Dr. S.S. Dash
Scientist-F and In-charge
of the Technical Section
Botanical Survey of India (BSI)

Invited Speaker

Prof. S. Hara Sreeramulu
Managing Director
Yess India Research and
Development Centre, Visakhapatnam

Invited Speaker

Prof. M. Venkaiah (Rtd.)
Department of Botany
Andhra University
Visakhapatnam

Who can apply?

Faculty members, researchers, students from academic & research institutions and public those who are interested on Biodiversity and conservation.

Registration Details

Registration fee
