(57) Abstract :

ABSTRACT: Title: A Composition for Treating Pancreatic Cancer and Method of Preparing the Same The present disclosure proposes an herbal fruit peel mixture composition for treating pancreatic cancer. The composition of the herbal fruit peel mixture comprises 20 to 40 weight percent of a Litchi chinensis (lychee), 20-40 weight percent of a Punica granatum (pomegranate), 10-20 weight percent of a Vitis vinifera (grapes), 10-20 weight percent of a Hylocereus undatus (dragon fruit), and 20-40 weight percent of a Garcinia indica (kokum). The herbal fruit peel mixture acts as an alternative chemotherapeutic agent for controlling pancreatic cancer through its action against oxidative stress, inflammation, metastasis, invasion, and proliferation. The proposed invention provides a safe and effective herbal fruit peel mixture to overcome the various adverse effects associated with existing medications for pancreatic cancer. The herbal fruit peel mixture controls the growth and development of pancreatic cancer.
